

# This is Afterschool in New Mexico

"Afterschool programs created so many opportunities for me, and I love the valuable mentorship I have had and the connections I made. Afterschool programs taught me the importance of goals and my dreams."

"From my experience as a military child, I really had to struggle with the difficulty of trying to be myself. ... Having an afterschool program can get kids out of their comfort zone and [help them] make new friends. Meeting people in these programs not only feels great but also allows students to show their true self."

These student quotes are a small sampling of the invaluable supports and experiences afterschool programs are providing young people—from creating a safe space where they can connect with caring adults to helping them build the skills to reach their full potential.

However, in New Mexico, for every child in an afterschool program, 3 more would participate and are missing out, despite strong public support for afterschool. A national fall 2022 survey found that approximately 8 in 10 registered voters said that afterschool programs are an absolute necessity for their community (79%) and want their federal, state, and local leaders to provide more funding for programs (80%).

## AFTERSCHOOL PROGRAMS ACCELERATE STUDENTS' ACADEMIC GROWTH AND SUPPORT THEIR WELL-BEING

Among New Mexico students in afterschool programs:

**65%** are getting homework help

**88%** are interacting with their peers and building social skills

**64%** are engaging in STEM learning opportunities

**85%** are building confidence

**87%** are taking part in physical activities

**73%** are learning responsible decision-making

**92%** of New Mexico parents are satisfied with their child's afterschool program

## EVIDENCE OF AFTERSCHOOL'S IMPACT ON STUDENTS' WELL-BEING

Only 10 states\* have included questions regarding participation in afterschool programs in their state Youth Risk Behavior Survey (YRBS), conducted as a part of an effort by the U.S. Centers for Disease Control and Prevention. However, these additional questions have produced findings demonstrating positive correlations between participation in afterschool programs and young people's mental and physical health. For example:

**ALASKA** Students participating in afterschool programs at least two days a week were 18% less likely to use alcohol, 39% less likely to use marijuana, and 28% less likely to have an unexcused absence.

**VERMONT** High schoolers who participated in at least one hour of afterschool activities were less likely than their non-participating peers to report carrying a weapon or report being threatened or injured by a weapon on school property.

**WISCONSIN** Students involved in at least one hour of extracurricular activities report lower rates of anxiety, depression, and suicidal thoughts.\*\*

\*AK, CT, MI, MN, NM, OH, VT, VI, WA, WI

\*\*The Wisconsin YRBS question in the middle school questionnaire asked, "During an average week when you are in school, how many total hours do you participate in school activities such as sports, band, drama, or clubs" and the high school questionnaire asked, "Do you participate in any school activities, such as sports, band, drama, or clubs?"

Studies have shown that students regularly participating in quality afterschool programs attend school more often, are more engaged in school, get better grades, and are more likely to be promoted to the next grade. A 2022 evaluation of New Mexico's 21<sup>st</sup> CCLC programs by the Southwest Outreach Academic Research Evaluation and Policy Center found that more than one-third of participants improved their grades from the first to last quarter of the school year, in reading (34%) and in math (35%) and more than 4 in 5 students maintained a passing grade throughout the school year in reading (81%) and math (82%). Additionally, students report positive benefits from participating in the program, with overwhelming majorities of students in K-6<sup>th</sup> grade and 6<sup>th</sup>-12<sup>th</sup> grade agreeing that they feel better about themselves because of the program (79% and 66%, respectively) and that they've started doing better in school since starting the program (74% and 69%, respectively). Middle and high schoolers agreed that their program has helped them understand that goal setting is important (76%) and how to make career choices (63%).

### AFTERSCHOOL PROGRAMS SUPPORT WORKING FAMILIES

New Mexico parents agree that afterschool programs:

**85%** are helping working parents keep their jobs

**86%** are providing working parents peace of mind knowing that their children are safe

### AFTERSCHOOL PROGRAMS ARE A SMART INVESTMENT

An overwhelming majority of New Mexico parents favor public funding for afterschool and summer learning programs.

Research spanning several states shows that **every \$1 invested** in afterschool programs **saves at least \$3** by:

- ✓ Increasing kids' earning potential as adults
- ✓ Improving kids' performance at school
- ✓ Reducing crime and juvenile delinquency

## 21<sup>st</sup> Century Community Learning Centers

21<sup>st</sup> Century Community Learning Centers (21<sup>st</sup> CCLC) are local before-school, afterschool, and summer learning programs that serve students attending high-poverty, low-performing schools. These programs engage students in hands-on learning activities aimed at supporting their academic growth, provide a variety of enrichment activities to complement school-day learning, and offer educational and support services to the families of participating children. The 2022 Department of Education annual performance report of 21<sup>st</sup> CCLC found that among regular participants in need of improvement:

- ✓ **NEARLY 1 IN 2** improved their language arts or math grades
- ✓ **NEARLY 7 IN 10** improved their homework completion and class participation
- ✓ **NEARLY MORE THAN 3 IN 5** improved their behavior in class

In New Mexico, 16,789 children in 213 communities take part in a 21<sup>st</sup> Century Community Learning Center. 21<sup>st</sup> CCLC grants are the only dedicated federal funding sources that support local communities' afterschool and summer programs. Demand for programming in New Mexico is so great that 1 out of every 4 applications was not funded during the most recent competition.

### AMERICAN RESCUE PLAN FUNDING IS HELPING INCREASE ACCESS TO AFTERSCHOOL AND SUMMER PROGRAMS

A spring 2023 survey of afterschool and summer program providers found that while less than 1 in 5 providers (17%) report that they have received COVID-relief funding, those with this funding stream have been able to use it to keep their doors open and increase access to their program. Programs report that they have been able to bolster staff recruitment efforts (47%), hire more staff (44%) and serve more students (44%), expand program offerings (38%), and offer new summer programs (18%).

Funds from American Rescue Plan (ARP) continue to present a tremendous opportunity to help increase access to afterschool and summer programs. For example, since 2021, the New Mexico Public Education Department has administered grants to local community-based organizations and local education agencies using the 1% set aside for afterschool programs from ARP Elementary and Secondary School Emergency Relief (ESSER) III funds. As a result, more than \$4 million was distributed to support quality afterschool programs. One example is the Boys & Girls Club of Carlsbad, which was granted \$179,997 over the course of three years to expand their programs, which provides homework help, sports, wellness programs, and leadership opportunities to students.
